Getac

DS-GTC-200 Series

The Havis Docking Station for the Getac F110 tablet will improve mobile worker productivity by providing a secure location for tablet charging and connection to essential peripherals, such as printers, keyboards and barcode scanners. Recessed port replication will protect cable connections and allow for strain relief to prevent accidental disconnects.

The docking station series will include a variety of models that feature a triple high-gain antenna to improve range and Lind power supply with customized cord length and connector tip. It will also be one of the first Havis docking stations to offer models with an internal power supply that connects to the vehicle's lighter plug for convenient charging.
